Thank you for your e-mail of August 7, 2007, regarding the radiation monitoring and construction of the laydown area on the future DuSable Park. We have reviewed the information and have the following comments:

1. Area C - due to the proximity of the access road to Area C, we request that you either remediate Area C or place warning signage plus jersey barriers on three sides around Area C. Suggested language for the warning signage - "Keep Out Radioactive Material". In order for the language to be visible, we recommend 6 inch high lettering.
2. Area A - we that you place jersey barriers on all four sides of Area A and the same warning signage as mentioned in #1 above.
3. Areas B1, B2, and B3 - we request that you place chain-link fencing and the same warning signage at each B location.

You will note that we are sending a copy of this response to the property owner, Chicago Park District, via Ed Walsh and Bill Bow of LFR, to ensure that they are aware of the activities at DuSable Park.

Additionally, today, a citizen observed chipping activities on DuSable Park. As we discussed, STS was not present on site when this activity commenced. Please ensure for future activities at DuSable Park that you make every effort to prevent exposure and/or release of radioactive thorium contamination.

If you have additional questions, please contact me at (312) 886-3601 or via cell at (312) 802-1404.
